

# TROOP 292 of HOOKSETT, NH

## **INDOOR TRIP COVID PRECAUTIONS**

*(Battleship Cove, Chill Trip, Crossover)*

In the interest of keeping all our scouts and adults safe, the following plan will be in place for our upcoming indoor trips:

- Troop 292 will use the Daniel Webster Council COVID-19 guidelines (<https://nhscouting.org/coronavirus/>) as minimum level protection, with the following additions or modifications:
- All scouts and adults are encouraged (but not required) to get vaccinated.
- Any participant who is experiencing symptoms of or who has been exposed to COVID should stay home from the activity.
- While indoors (on the ships at Battleship Cove or in cabins), all participants will wear face coverings as much as possible. Coverings may be removed for eating and drinking, while sleeping (*see below*) and when outdoors.
- Frequent hand washing / sanitizing will be encouraged. Hand sanitizer will be available.
- Sleeping areas will be arranged to maximize space between participants. This may involve scouts sleeping foot-to-foot, or alternating head/feet on neighboring bunks as needed.
- Extra ventilation will be provided when possible – opening windows in cabins, etc. Participants should bring sufficiently warm sleeping bags to compensate for the extra ventilation in winter.
- Participants should do their best to maintain social distancing during activities.

Participants should also be aware that as the winter goes on and situations with the pandemic change, any trip may be canceled due to shut down of facilities.
